

Scholarship opportunities 2009

"Students who want to study at the best UK universities must be truly exceptional to win their place. Last year, Oxford and Cambridge rejected more than 24,000 students, while in 2007 degree programmes in Medicine and Dentistry were oversubscribed, with three students competing for every international place. High A-level grades alone are not a guaranteed route into your chosen university."*

DR RICHARD HARVEY
DIRECTOR OF ADMISSIONS, UEA

*UCAS, 2007

HOW CAN YOU BE BETTER THAN THE BEST? TAKE A-LEVELS AT A LEADING RESEARCH UNIVERSITY

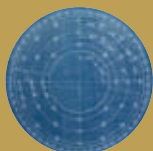

Study science where science happens

Even the best high school students need an extra advantage to help ensure they achieve their educational goals.

The Newton Programme at the University of East Anglia offers a great deal more than a standard A-level programme to international and British students who are committed and talented enough to become tomorrow's leading scientists, engineers, mathematicians and economists.

In addition to receiving specialist A-level tuition from highly qualified teachers, Newton Students have the unique opportunity to **study science where science happens** in a leading research university environment.

What would being a Newton Student mean for you?

As part of your A-level programme you will join University of East Anglia undergraduates in lectures and practical laboratory sessions, taught by leading academics.

The university campus experience will equip you with the skills you need to confidently progress to a degree programme at the University of East Anglia, Oxford, Cambridge or one of the UK's medical schools.

Our state-of-the-art INTO Centre on the University campus combines modern, inspiring learning facilities with safe and secure residential accommodation, where our carefully trained staff will provide day and night support to ensure you are comfortable and well cared-for in your new 'home-away-from-home'.

... AND TAKE ADVANTAGE OF A NEWTON SCHOLARSHIP WORTH UP TO £8,000

If you are a high-achiever heading for 'straight As' . . .

... and if you have the talent to progress to an elite university, Newton Scholarships provide financial support to reduce your tuition fees.

The Scholarship is awarded for academic merit, so you do not need to apply for it. Our experienced teachers will assess your eligibility when you apply for the Newton Programme.

Scholarships are available for any of the four specialist A-level pathways and for both the standard five- and six-term and fast-track three-term programmes. The value of the scholarship will depend upon your performance in either your GCE O-level examinations or the equivalent qualification in your home country.

To qualify for the maximum £8,000 scholarship, you should have achieved or expect to achieve a minimum of five A* grades at GCE O-level, including Mathematics, English and the three subjects you intend to study at A-level.

Scholarships ranging from £2,000 to £6,800 are available if you have achieved grade A or A* in English and Mathematics supported by high grades in your chosen A-level subjects.

The table shows the points system that determines the value of your scholarship. You are guaranteed a scholarship of at least £2,000 provided you achieve 20 or more points.

Points system

5 points – grade A* (or equivalent)

4 points – grade A

3 points – grade B

2 points – grade C

Scholarship

20 points - £2,000

21 points - £3,200

22 points - £4,400

24 points - £6,800

25 points - £8,000

There is no formal deadline for the award of Newton Scholarships, but with limited places available we advise you to submit your application early.
